

Testimonials from Test Spectrum Customers

"Thanks for all the hard work. I would like to thank you for all the support you have given the team for the project. The loadboards functioned correctly. We'll be checking the 0.65mm boards today."

Product Manager, Freescale

"Thanks a lot to whole team for busting your butts up to the final hour. It looks like it has paid off! I am grateful to you all..."

Manager, Teradyne

"I just want to say I am extremely happy with the data and the support that you have provided the past couple of weeks. I believe that we are making great progress..."

Senior Staff Engineer, Xilinx

"Excellent work on a tough project. Guys I was very proud of all your effort and skills on this board. The job was completed despite our shortcomings with the documentation. Attached is the latest email describing the success of the board. Great Work! that is why you will be first in my book."

Hardware Manager, Freescale

"I just wanted to let you know that we populated one of these boards and put it to work immediately. It worked the first time. We should have a second board in use sometime tomorrow. Thanks for the quality product!"

Test Manager, Boston Scientific

"Thanks for the terrific support you've provided at Test Spectrum. We are very pleased with your technical accomplishments in bringing up our tests and your flexibility in finding hardware!"

Director of Operations, MathStar

"I have been reviewing the code that Test Spectrum wrote for us...it is excellent across the board. The code implements the projects requirement in full, with really thorough documentation. The documentation includes not only embedded comments, but a full complement of supporting documents as well. I will have no hesitation about returning to TSI to provide any new software implementations for other test systems. It was quality work."

CTO, Celerint
